Supplemental DETAILED ACTION

1. This action is in response to applicant's response filed on June 27, 2005. **Claims 1,2,5-8,11,14,15,20,22-30** are now pending in the present application.
2. A supplemental notice of allowance is being reissued since the Examiner did not renumber all of the claims correctly.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: The application is allowable for the reasons set forth on page 2 of the Applicant's response filed on January 3, 2005, which is hereby incorporated by reference.

As noted therein, and as argued on page 2 of Applicant's response, the claimed invention requires performing a look-up of the received authentication information within a line database to find the authentication information and services information associated with the authentication information that the stored in the line database whereas the closest prior art, McAllister, relies on a first look-up by the IP to authenticate the user, and then once authenticated, McAllister relies on a second look-up by the SCP in a different database to find the services, but it does not provide where a look-up within a line database finds both the authentication information and the services information associated with the authentication information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2645
